

In this time of growing concern surrounding the COVID-19 virus, we want to assure our clients that the leadership of Robinson Window Cleaning is closely monitoring developments and that we take this situation very seriously. The Centers for Disease Control and Prevention (CDC) reports that there are several confirmed cases of COVID-19 in Alabama and neighboring states.

As always, our top priority is the safety and well-being of our clients, staff, and the communities we serve. We have already taken several precautionary steps to prepare for any potential impact due to COVID-19:

- We are providing our staff with information on how to handle potential exposures and following the CDC guidelines
- We have temporarily modified our business travel policy and are monitoring staff's personal travel to any impacted locations
- We have contingency plans in place designed to prevent any service disruptions due to the virus
- We have reviewed our cleaning and sanitation procedures and have added Lysol disinfectant to help prevent and/or stop the spread of any viruses
- We are taking extra precautions for tenant safety we will specifically ramp up aerosols and disinfectant around all entry lobby and door way glass in high traffic areas etc

At Robinson Window Cleaning, we are dedicated to providing the best possible service to you, our client, while at the same time maintaining a healthy and secure work environment for our staff. It is impossible to predict the spread of COVID-19 or fully understand the impact it will have over the coming weeks. We will continue to stay close to this situation and adapt as new information becomes available. Our focus is on continuing to serve you while protecting the health of our clients and staff.

Thank you for continuously choosing Robinson Window Cleaning.
